

## Cumulative Keyword Index for Volumes 81–82<sup>☆</sup>

### A

4/8 task, **82**, 216  
Acetylcholine, **82**, 230  
Acoustic CS, **81**, 162  
Activity, **81**, 172  
Adenosine, **81**, 137  
Adolescent, **81**, 75  
Aging, **81**, 19; **82**, 128  
Alzheimer's disease, **81**, 27  
Amphetamine, **82**, 61  
Amygdala, **81**, 60; **82**, 216, 230, 243, 333  
Analgesia, **82**, 57  
Anandamide, **81**, 144  
Angiotensin II, **81**, 100  
Antisense oligodeoxynucleotide, **81**, 120  
Anxiety, **82**, 243, 333  
AP5, **81**, 60  
AP-5, **81**, 60; **82**, 81  
APV, **81**, 60  
Attention, **82**, 65, 99  
Auditory fear conditioning, **81**, 67  
Avian brain, **81**, 155  
Avoidance learning, **82**, 90  
Avoidance training, **81**, 155

### B

Basal ganglia, **82**, 81, 150, 178, 253  
Behavioral flexibility, **82**, 81  
 $\beta$ -Amyloid precursor protein, **81**, 27  
Bird, **81**, 155

### C

C57BL/6, **81**, 96  
CA1, **82**, 26  
Caffeine, **81**, 137  
Caudate nucleus, **82**, 199, 243  
CD1 mice, **81**, 144  
Cerebellum, **82**, 120  
Chicks, **81**, 115  
Circadian rhythms, **81**, 217  
Classical, **81**, 82  
Computational models, **82**, 253  
Conditioned cue preference, **82**, 216  
Conditioned cue preference learning, **82**, 230  
Conditioned freezing, **81**, 162, 172  
Conditioning, **81**, 82, 217; **82**, 171  
Consolidation, **81**, 12  
Context, **81**, 162; **82**, 77, 99  
Context preference, **81**, 217

Contextual conditioning, **82**, 61  
Cortex, **81**, 200  
CREB, **81**, 19  
Cross-tagging, **82**, 12

### D

DBA/2, **81**, 96  
Declarative memory, **82**, 178  
Declarative, **82**, 171  
Dentate nucleus, **82**, 120  
Depression, **82**, 128, 333  
Discriminated avoidance learning, **81**, 115  
Discrimination, **81**, 75  
Discrimination learning, **82**, 178  
Domestic chick, **81**, 155  
Dopamine, **81**, 155  
Dopamine D1 receptors, **82**, 65  
Dopaminergic system, **81**, 144  
Dorsal hippocampus, **81**, 172  
Dorsal striatum, **82**, 333  
Drug abuse, **82**, 333  
Drug addiction, **82**, 333

### E

Egocentric learning, **82**, 120  
Egocentric movement, **82**, 278  
Egocentric-motor-based sequences, **82**, 120  
Elevated T-maze, **81**, 172  
Emotion, **81**, 67; **82**, 243  
Entorhinal cortex, **82**, 1, 52  
Episodic, **82**, 171  
Erk, **82**, 65  
Estrogen, **82**, 57, 142  
Event-based memory, **82**, 199  
Exploratory behavior, **81**, 27  
Extinction, **82**, 128

### F

Fear, **82**, 333  
Fear conditioning, **81**, 185  
Fimbria–fornix, **82**, 216  
Food restriction, **81**, 96  
Food search spatial learning task, **81**, 120  
Footshock intensity, **81**, 162

### G

GABAergic system, **82**, 52  
Gender, **82**, 57  
Generalization, **81**, 162  
Glucocorticoids, **81**, 67, 150  
Glutamate, **81**, 115, 137

<sup>☆</sup>Boldface numbers indicate volume; lightface numbers indicate pagination.

Glutamate reuptake, **81**, 115  
 Guanosine, **81**, 137

## H

Habit, **82**, 171  
 Habituation, **82**, 99  
 Heart rate variability, **81**, 167  
 Hemi-lesion, **81**, 150  
*Hermisenda*, **81**, 12  
 Heterosynaptic late-associativity, **82**, 12  
 Hippocampus, **81**, 1, 185, 200; **82**, 52, 57, 109, 178, 199, 216, 230, 243, 253, 278, 309, 333  
 $\beta$ -Hydroxamate, **81**, 115  
 Hypothalamus, **81**, 200

## I

Immediate early gene, **82**, 99  
 Immobility, **82**, 128  
 Inhibitory avoidance, **81**, 60, 137, 150  
 Instrumental, **81**, 82  
 Interactions, **82**, 230, 333

## K

Knowledge-based memory, **82**, 199

## L

Latent inhibition, **82**, 61, 77  
 Learning, **81**, 1, 60, 67, 82, 100, 155, 185; **82**, 77, 81, 142, 216  
 Learning and memory, **81**, 217  
 Learning strategy, **82**, 309  
 Lesion, **81**, 172  
 Lidocaine, **82**, 26  
 Long-term depression, **82**, 12  
 Long-term potentiation, **81**, 105; **82**, 12  
 LTP, **81**, 105  
*Lymnaea*, **82**, 164

## M

Matching-to-position, **82**, 109  
 Memory, **81**, 1, 19, 75, 100, 137, 155; **82**, 81, 90, 109, 142, 216, 243, 333  
 Memory consolidation, **81**, 60, 67, 144; **82**, 52  
 Memory retention, **81**, 167  
 Memory stages, **81**, 12  
 Memory systems, **82**, 230  
 Mice, **82**, 26, 90  
 Modulation, **82**, 309  
 Morphine, **81**, 144  
 Morris water maze, **81**, 19  
 Motor learning, **81**, 211  
 MPTP, **81**, 150  
 Multimodal, **82**, 99  
 Multiple memory systems, **82**, 199, 216

## N

Neocortex, **82**, 253  
 Neurochemistry, **82**, 128  
 Neurogenesis, **81**, 1  
 Neuron, **81**, 82  
 NMDA, **81**, 60; **82**, 81  
 nmdaLTP, **81**, 105  
 Nondeclarative, **82**, 171

Novelty, **81**, 27, 96  
 Nucleus accumbens, **81**, 120; **82**, 333

## O

Object discrimination, **81**, 96  
 Object exploration, **82**, 1  
 Object memory, **82**, 26  
 Obsessive-compulsive disorder, **82**, 333  
 One-trial inhibitory avoidance, **81**, 144  
 Ovariectomy, **82**, 142

## P

Paradoxical sleep deprivation, **82**, 90  
 Parallel processing, **82**, 216  
 Parasympathetic nervous system, **81**, 167  
 Parietal cortex, **82**, 199  
 Parkinson's disease, **81**, 150  
 Passive avoidance, **81**, 100, 115  
 Performance, **82**, 57  
 Perirhinal cortex, **82**, 178  
 PKC expression and activity, **81**, 120  
 PKC- $\gamma$ , **81**, 120  
 Place cells, **82**, 278  
 Place learning, **82**, 230  
 Plasticity, **81**, 60  
 Posterior parietal cortex, **82**, 52  
 Prefrontal cortex, **82**, 199, 333  
 Prelimbic/infralimbic, **82**, 65  
 Priming, **82**, 171  
 Procedural learning, **82**, 120  
 Procedural, **82**, 171  
 Proliferation, **81**, 1  
 Propranolol, **81**, 150  
 Protein synthesis, **82**, 12

## R

Rats, **81**, 100, 211; **82**, 1, 61, 77, 109  
 Recall, **81**, 12  
 Recognition memory, **81**, 27; **82**, 178  
 Relaxation training, **81**, 167  
 Reproductive hormones, **82**, 309  
 Response competition, **81**, 172  
 Response learning, **82**, 230, 278  
 Retention, **81**, 12  
 Retrosplenial cortex, **82**, 1  
 Reward, **82**, 109  
 Rotarod, **81**, 211  
 RS 79948, **82**, 243  
 Rule-based memory, **82**, 199

## S

Schizophrenia, **82**, 333  
 Semantic, **82**, 171  
 Sex differences, **82**, 57  
 Single unit activity, **82**, 278  
 Songbird, **82**, 99  
 Spatial discrimination, **81**, 96  
 Spatial learning, **81**, 27, 105, 120; **82**, 120, 230, 278  
 Spatial memory, **81**, 1, 105, 185  
 Strain differences, **81**, 217  
 Strategy selection, **82**, 230  
 Stress, **81**, 1, 185  
 Stress hormone, **81**, 67, 150  
 Striatum, **81**, 155; **82**, 81, 230, 243, 278, 309

Substantia nigra, **81**, 150  
Sucrose, **82**, 164  
Survival, **81**, 1  
Synapse, **81**, 200  
Synaptic plasticity, **81**, 200  
Synaptic tagging, **82**, 12

## T

Tactile stimulation, **82**, 164  
Taste aversion, **81**, 155; **82**, 77  
Taste aversive conditioning, **82**, 164  
Thalamus, **81**, 200  
Time of day, **82**, 77  
Time-stamp, **81**, 217  
Trace conditioning, **82**, 65  
Training, **81**, 211  
Transcription factor, **81**, 19  
Type II receptor, **81**, 185

## U

Unconditioned, **81**, 82  
Unconditioned stimulus, **82**, 57

## V

vdccLTP, **81**, 105  
Ventral hippocampus, **81**, 172

## W

Water maze, **82**, 128, 142  
Win-shift, **82**, 216  
Win-stay, **82**, 216  
Working memory, **82**, 65

## Y

Yohimbine, **82**, 243
